

What will you choose to do?

- Visit your local library and search for space-themed books. Read and talk with an adult about the books you find.
- With an adult, search the web for fascinating space facts and make your very own space fact book.
- Ask an adult to help you find the names of all the people who have walked on the Moon. There are 12 of them!
- Use an app to find constellations, planets and stars in the night sky. Which constellation is the easiest to recognise? Which star is the brightest?
- With an adult, explore the Hubble Space Telescope website. Check out the amazing gallery images!
- Imagine you're an astronaut completing different space missions and make a mini book about your work.
- Make a telescope from junk cardboard materials and sticky tape. Just before bedtime, use your telescope to look up at the stars. Can you see any wonderful star patterns in the sky? Grab a piece of paper and draw the pattern of stars that you spotted. Take the pattern to school to share with the class.
- Can you make up a space song or rhyme? Teach the song to your class and perform it as a space choir!
