

Topic: An amazing year of learning!

Computing Stars

This year we've been working hard to improve our computing skills.

What skills have you been developing at home? (not just playing computer games!)

Can you produce a powerpoint, program, design, animation or perhaps something else to share with us?

Amazing Authors!

Use your imagination - Can you write your own story? What will it be about? Where will it be set? What will happen? How will you keep the reader engaged? Your story will be shared with the class if you want!

Art and DT

Consider our wonderful work in Art and DT this year. Can you use one of our topics to inspire you to create something extra special?

Summer Fun!

Do you know of amazing activities to do in the Summer Holidays? Have you done them? Can you create a leaflet for your favourite activity, or for lots of different activities, to give out to the class?

Scrapbooking!

Make a 'memory book' to help you remember what a fantastic year we have all had. You could add photos from parties that you have been to, photo of school trips (ask your teacher), memories of your favourite lessons and anything else fantastic you can think of.

Science Investigations

This term we've been working hard on learning about the rainforests and living things. Can you carry out your own investigation to research something of interest to you, related to Science? How will you present your findings?

World Cup Fever!

It's here again! Tell us about your world cup experience! Photos? Can you create any artwork or designs to celebrate the event? If you could make your perfect world cup team, with players from any of the countries, who would be in it? Why?!
